Expeditious Deployment for Remote Work

- ▶ Mobilizes existing desktops
- ▶ Minimal infrastructure requirements
- ▶ Deployed within two weeks
- ▶ Fixed fee

DEMAND

COVID-19 and the fear and uncertainty around the virus are testing the ultimate capabilities of businesses to maintain productivity in the event of ongoing spread and, in many cases, highlighting improper planning around business continuity. Businesses must now focus on sustaining productivity by providing potential accommodations for a remote work strategy, ideally while avoiding complex technology decisions.

KEEP IT SIMPLE

SWIFT is designed to provide quick deployment services to enable remote accessibility to your existing desktop fleet, avoiding the need for resource-heavy efforts in data center capacity and architecture. This turnkey strategy can be deployed within weeks, with high confidence factors and minimized demand on your internal IT resources, both during implementation and with ongoing support. SWIFT also provides a foundational platform to allow for continued innovation amongst ongoing entropy in the workforce.

APPROACH

Citrix Cloud powered strategy to facilitate remote access to existing desktop fleet.

100% cloud-based solution minimizes data center demand and architectural considerations.

By deploying Citrix on your existing desktop fleet, remote accessibility is guaranteed and provides the same "in office" user experience.

Deployed quickly with minimal impact to existing staff and infrastructure.

Desktops become globally and securely accessible via any device and over any network.

Focused on user needs and maintaining productivity while sustaining future proofing and forward-looking strategy.
